Yes, headed to the airport for Battelle in a couple hours and will be flying direct from New Orleans to Newark Thursday a.m. Looks like weather may be okay for me this week, but I'll let you know if there are any issues getting up there Thursday. Thanks!

Those are good additions – I'll be accepting all. See you and Mike at the CAG meeting on Thurs. Bi-weekly calls starting next week is fine.

(I just realized: Weren't you planning on going to Battelle Sediments Conf this week?)

This looks good to me. I've inserted several suggestions you may want to consider for a little more insight on deliverable content, but for that reason it may be more than needed in an initial summary of the SOW timeline.

1. I included reference to the HASP and QAPP in the PDI WP to cue readers of process-oriented components as well as technical (FSP seemed redundant for this presentation).
2. I included reference to sediment handling areas in the Site Selection WP (in addition to

processing facility) as example-prompt to types of smaller properties we may include consideration – the community may be as interested in potential of smaller staging or pump stations as they are of the processing facility, although we'll be trying to minimize complexity of footprints to the extent practicable of course.

3. I added sediment processing technologies to the treatability study work plan. This isn't specifically mentioned in the SOW for treatability study, but it will be a near certainty in some form for disposal and water management so I think it's safe to present. It's also one place the Clean and Green policy may assist in decision process.

Thanks for the opportunity to review. I'm traveling this afternoon, but don't hesitate to contact me if you've got any questions. I realized over the weekend I did not extend our bi-weekly Outlook invite into 2017, so I will be adding that shortly. Since I will be traveling up for the CAG this Thursday (from Battelle so it's a day), I'll start them next week if that works for you. Mike Anderson is planning to attend on Thursday as well.

Juan

Thanks. Attached is what I came up with – the info is consistent with what your table has, but I thought I would send it to you in case you saw anything that doesn't look right. I'm hoping to finish it up early tomorrow morning so I can send it to CAG Facilitator/Chairs to make sure it's what they wanted.

We are populating this draft table of AOC deliverables we developed for attachment to the status reports – it's a little more detailed and relational (e.g. 90 days following...) than you may be thinking for the CAG but maybe useful to cross check.

Subject: CAG Meeting

CAG meeting is confirmed for next Thurs 1/12 at 6pm at St James Church. Agenda is going out shortly, but will consist of short updates from EPA and the Urban Waters Ambassador, followed by a presentation from NJDEP on the restoration projects that were recently announced by the Governor's office.

The CAG asked for a timeline of RD submittals – I will be putting something together based on the AOC schedule. I'll send it to you for review before sharing with CAG.
